SUMMARY

Architected scalable web applications leveraging the MERN stack and Java, increasing user engagement by **30%** through customized feature delivery. Demonstrated expertise in minimizing API response times, designing efficient database schemas, and deploying fault-tolerant systems capable of processing high-volume traffic.

EDUCATION

VIT Bhopal University – Bachelor of Technology, Computer Science & Engineering

Sept 2023 – May 2027

GPA: 8.77 / 10.00 | Coursework: Computer Architecture, Data Structures and Algorithms, Theory of Computation, Compiler Design

EXPERIENCE

ServiceNow – Intern

May 2026 – Jun 2026

- Developed **5+** automated reporting tools for administrative workflows, reducing manual data entry overhead by **40%**.
- Scripted **15+** comprehensive test cases using the Automated Test Framework (ATF), enhancing cross-environment release reliability by **25%**.

Unified Mentor – Full Stack Developer Intern

Feb 2026 – Apr 2026

- Engineered end-to-end platforms (**Rent Mojo** and **Entre Skill Hub**), structuring complex multi-collection NoSQL hierarchies that decreased data retrieval latency by **20%**.
- Designed responsive front-end interfaces employing React.js and Tailwind CSS, improving render speeds by **30%** while supporting **50+** concurrent active sessions.

PROJECTS

Product AI: E-Commerce Price Optimization | [GitHub](#)

Jan 2026 – Mar 2026

Python, Scikit-learn, Pandas, FastAPI, Tailwind CSS

- Formulated a machine learning model to predict retail pricing, achieving **92%** accuracy through advanced Natural Language Processing (NLP) techniques.
- Implemented robust regression pipelines within a FastAPI backend, seamlessly processing a dataset exceeding **10,000+** commercial records.
- Designed an interactive frontend data visualization dashboard, reducing commercial data interpretation time by **30%**.

TechNova E-Commerce Platform | [GitHub](#) | [Live Demo](#)

Nov 2025 – Jan 2026

Java 21, Spring Boot 3, Next.js, MongoDB

- Built a feature-rich digital storefront sustaining **500+** daily users, bridging secure backend infrastructure with interactive client elements.
- Leveraged Next.js Server-Side Rendering (SSR) to optimize SEO performance, slashing initial load times by **35%**.
- Integrated secure authentication flows via JSON Web Tokens (JWT) alongside frictionless UPI payment gateways.

ATS-AI (ResumeIQ) | [GitHub](#) | [Live Demo](#)

Aug 2025 – Oct 2025

React 18, Node.js, Express.js, Gemini API

- Created an intelligent parsing tool to evaluate **200+** resumes, attaining a **95%** accuracy rate via N-gram keyword extraction for optimal ATS compatibility.
- Pioneered AI-driven career coaching modules that suggest tailored skill additions, successfully interpreting multiple complex document formats.
- Incorporated Gemini API endpoints to generate contextual profile summaries, minimizing manual editing time by **60%**.
- Architected a fault-tolerant Express.js server foundation, ensuring **99.9%** uptime during peak automated document processing loads.

TECHNOLOGIES

Languages	Java, C++, C, SQL, MongoDB, JavaScript, Python
Web Technologies	Spring Boot, Hibernate, React.js, Express.js, HTML5, CSS3, Node.js, REST APIs, Next.js
AI/ML	TensorFlow, PyTorch, Large Language Models (LLMs), YOLOv8, OpenCV, Gemini API, NLP, NumPy, Pandas, Matplotlib, Scikit-learn
Tools & Platforms	Git, GitHub, VS Code, IntelliJ, Eclipse, Replit, AWS Services, Vercel, Render
