[LinkedIn](#) | [GitHub](#)

Education

VIT Bhopal University, BTech in Computer Science

Sept 2023 – May 2027

- GPA: 8.77/10.0
- **Coursework:** Computer Architecture, Data Structures and Algorithms, Theory of Computation, Compiler Design

Experience

Full Stack Developer Intern, Unified Mentor

Feb 2026 – April 2026

- Engineered full-cycle web platforms (**Rent Mojo** and **Entre Skill Hub**); designed scalable MongoDB schemas that reduced overall API data retrieval latency by **20%**.
- Developed interactive frontend architectures using React.js and Tailwind CSS, increasing system load speeds by **30%** for **50+** concurrent users. **Tech:** MongoDB, Express.js, React.js, Node.js, Git.

Projects

Kumbh Yatra AI: Command Center 2026 | Next.js & Data Simulation [\[GitHub\]](#) | [\[Live\]](#)

- Built a production-ready command center for the 2026 Mahakumbh Mela, integrating live multi-city navigation and reverse geocoding via the Nominatim OpenStreetMap API.
- Engineered a real-time simulation engine using React Context to dynamically monitor footfall, parking capacity, and river safety metrics for over **100M+** simulated pilgrims.
- Integrated a multi-language Deep Translation Engine (EN/HI/ES/FR) and a voice-activated AI assistant utilizing the browser's native Web Speech API. **Tech:** Next.js 16, React 19, Leaflet, Recharts.

Product AI: E-Commerce Price Optimization | Machine Learning & Full-Stack [\[GitHub\]](#)

- Designed a machine learning system to predict optimal e-commerce prices, achieving a **92%** prediction accuracy by extracting features via NLP and TF-IDF vectorization.
- Deployed a predictive regression pipeline via a Python FastAPI backend and React.js interface, efficiently handling over **10,000+** product records. **Tech:** Python, FastAPI, Tailwind CSS.

ATS-AI (ResumeIQ) | Full-Stack MERN Optimization Platform [\[GitHub\]](#) | [\[Live\]](#)

- Created an enterprise MERN platform processing over **200+** resumes with a **95%** parsing accuracy utilizing N-gram keyword extraction for ATS compatibility.
- Developed an AI-powered Bullet Rewrite Coach with an Auto-Skill Injection system, integrating document processing (.pdf, .docx) via in-memory streams.
- Integrated the Google Gemini API to power context-aware text summarization, reducing average manual resume rewrite time by **60%**. **Tech:** React 18, Node.js, Express.js.

Technologies

Languages: Java, SQL, MongoDB, JavaScript

Web Technologies: React.js, Express.js, HTML5, CSS3, Node.js, REST APIs, Next.js

AI/ML Technologies: ChatGPT, Claude, Gemini, Gemini API, Antigravity, YOLOv8

Tools & Platforms: Git, GitHub, VS Code, IntelliJ, Eclipse, Replit, AWS Services, Vercel, Render

Certifications

- Oracle Gen AI Foundation Certification – Oracle [\[Link\]](#)
- Oracle Gen AI Professional Certification – Oracle [\[Link\]](#)
- Google IT Support: Bits and Bytes of Computer Networking Certification [\[Link\]](#)

Achievements

- **ServiceNow Micro Certification (May 2026):** Successfully earned Micro Certification in ServiceNow Administration during summer internship, validating platform expertise.
- **India's Largest Student Cloud Hackathon (5th Rank):** Secured 5th position among **1.5K+** developers at JNTUH, Hyderabad.
- **Glitch the System Hackathon (2nd Rank):** Programmed a functional rebadging website on Replit alongside two teammates under strict time constraints.
- **TCS CodeVita Qualifier:** Successfully cleared Round 1 of the Global Competitive Programming Contest among **100,000+** participants.
- **Data Structures & Algorithms:** Successfully implemented optimal solutions for **150+** algorithmic and optimization challenges on LeetCode.
- **Hardware & IoT Integration:** Gained hands-on experience in engineering and building an IoT-based car operated seamlessly via customized laptop commands.
