Summary

Results-oriented Full Stack Developer architecting scalable MERN and Java Spring Boot applications with integrated AI solutions.

Education

VIT Bhopal University, BTech in Computer Science

Sept 2023 – 2027

- **Achieved** a GPA of 8.77/10.0.
- **Coursework:** Computer Architecture, Data Structures and Algorithms, Theory of Computation, Compiler Design.

Experience

Intern, ServiceNow

May 2026 – June 2026

- **Managed** ServiceNow Administration, FlowS, and automated reporting frameworks to streamline operational workflows.
- **Obtained** ServiceNow Micro Certification and applied hands-on expertise with Automated Test Framework (ATF) and Agentic AI.

Full Stack Developer Intern, Unified Mentor

Feb 2026 – April 2026

- **Engineered** full-stack platforms (Rent Mojo & Entre Skill Hub), designing scalable MongoDB schemas that reduced API latency by 20%.
- **Developed** responsive UIs with React.js and Tailwind CSS, integrating Node.js REST APIs to boost load speeds by 30% for 50+ concurrent users.

Projects

Asbestos Detection | AI/ML & Computer Vision [\[GitHub\]](#)

- **Trained** a real-time YOLOv8 object detection model using PyTorch and OpenCV to identify hazardous asbestos, enhancing workplace safety and environmental monitoring.
- **Optimized** the inference pipeline to process continuous video feeds, achieving high-accuracy detection with minimal frame latency for industrial applications.

TechNova E-Commerce Platform | Full-Stack Java [\[GitHub\]](#) | [\[Live\]](#)

- **Architected** a scalable e-commerce platform utilizing a Java Spring Boot backend and a Next.js frontend, deploying microservices via Render and Vercel.
- **Engineered** stateless user authentication using Spring Security and JSON Web Tokens (JWT), alongside real-time UPI payment flows and Role-Based Access Control (RBAC).

AI Interview Preparation Platform | Gen AI [\[GitHub\]](#) | [\[Live\]](#)

- **Designed** and deployed a responsive React.js web application leveraging the Google Gemini API to conduct tailored, role-specific technical mock interviews driven by advanced prompt engineering.
- **Built** a full-stack evaluation engine using Node.js and MongoDB to instantly parse candidate inputs, delivering analytical performance metrics and targeted feedback.

Technologies

Languages: Java, SQL, MongoDB, JavaScript, Python

Web Technologies: Spring Boot, Hibernate, React.js, Express.js, HTML5, CSS3, Node.js, REST APIs, Next.js

AI/ML Technologies: TensorFlow, PyTorch, YOLOv8, OpenCV, Gemini API, NumPy, Pandas, Matplotlib

Tools & Platforms: Git, GitHub, VS Code, IntelliJ, Eclipse, Replit, Docker, AWS Services, Vercel, Render

Certifications

- **Earned** Oracle Gen AI Foundation Certification – Oracle [\[Link\]](#)
- **Attained** Oracle Gen AI Professional Certification – Oracle [\[Link\]](#)
- **Completed** Google IT Support: Bits and Bytes of Computer Networking Certification [\[Link\]](#)

Achievements

- **Secured** 5th position among 1.5K+ developers at India's Largest Student Cloud Hackathon at JNTUH, Hyderabad.
- **Advanced** past Round 1 of the TCS CodeVita Global Competitive Programming Contest.
- **Programmed** a functional rebadging website on Replit alongside two teammates under strict hackathon time constraints, securing 2nd Rank at Glitch the System Hackathon.
